**SNO-CONE CUPS PER 25CT - \$2.50**

**SNO-CONE STRAWS 25CT - \$1.00**

# SNO KONE MACHINE INSTRUCTIONS

## Sno-kone machines are easy to use and easily attract a crowd!

The Sno-Kone Machine is a great attraction for Birthday Parties, Functions and more! What a great way to entertain the kids! Kids love Sno-kones - and so do adults!

## Know the machine

Easy to operate, a Sno-kone machine is equipped with:

- 120-volt, 15 Amp, single-phase, 60-cycle, AC-current motor with button switch, shaving unit, dispensing case and separate light switch next to the shave button, all on an attractive "Genuine Sno-Kone" Cart.
- Cutterhead mounted on the end of the motor shaft inside the shaver body (gooseneck)
- Pusher handle presses the ice against the revolving cutterhead to produce shaved ice

**Note:** The machine must be properly grounded to prevent electrical shock

## Ice Requirements

The Sno-Konette can take ice cubes or block ice, if you break the block into pieces approximately 3 to 4 inches in size.

**NOTE:** the ice will not enter the shaving chute if the pieces are too large. NEVER allow any foreign or metallic objects around the shaver area of the Sno Cone machine. Ice pick, scoop, and debris that may be in the ice will damage blades

## Machine Operations

1. Turn on the light "ON-OFF" switch to "ON".
2. Use the ice scoop to fill the hopper to within an inch of the top with ice cubes or block ice (no larger than 3" to 4"). The larger the pieces, the better the snow.
3. Push the Red Shave Ice Button while pushing the pusher handle down against the ice in the hopper. Apply firm and even pressure to make the best snow. Practice will allow you to gauge when to stop pressing. This allows the ice to resettle against the shaver head. You may find that you need to relieve the pressure two or three times in a cycle. Too much pressure will result in snow that is coarse; too little pressure will make the snow mushy.
4. To prevent damage to blades, insert only ice in the gooseneck.
5. To prevent injury, keep fingers away from the shave body when motor is running.

## Making Your Sno-Kone

Use the Sno-Kone ladle to mound the ice into the Sno-Kone cup. Pump desired amount of flavoring over the ice. Enjoy!

20 Pounds of Ice makes about 75-100 6 ounce sno-cones.  
One Gallon of Syrup yields 128 1 ounce servings. You can get more out of it with a less generous pump of flavoring.

## Cleaning instructions

1. Unplug the machine
2. Wipe all surfaces **with water only**. Please wipe down the cart (if rented) and accessories as well.  
**WE WILL FINISH THE CLEAN UP WHEN THE MACHINE IS RETURNED.**
3. The Ice Scoop, Sno-Kone Baller, Syrup Pumps and Sno-Kone counter tray (supplied with the Deluxe Machine) are considered rentals and are supplied as a convenience to our customers. PLEASE return them or a replacement charge may incur.
